Professional Summary

Computer Science (Data Science) undergraduate with hands-on experience in data analysis, SQL, data cleaning, data validation, data modeling, and business intelligence. Experienced in working with structured datasets to identify data quality issues, transform data, and develop analytical solutions using Python, SQL, and Power BI. Strong analytical and problem-solving skills with an interest in enterprise data management, solution implementation, and technology consulting.

TECHNICAL SKILLS

Programming & Querying: Python, Java, SQL

Data Management & Analytics: Data Cleaning, Data Validation, Data Transformation, Data Analysis, Exploratory Data Analysis (EDA), Pandas, NumPy, Excel

Databases: MySQL, PostgreSQL, DBMS

Business Intelligence: Power BI, Power Query, DAX, Data Modeling, Dashboard Development, Data Visualization

Core Computer Science: Object-Oriented Programming (OOP), Data Structures & Algorithms, Operating Systems, Computer Networks, Software Engineering

Tools & Technologies: Git, GitHub, Jupyter Notebook, Flask

PROJECTS

Food Delivery Operations & Data Quality Analytics

Power BI, Power Query, DAX

- Developed an end-to-end Business Intelligence solution to analyze food delivery operations, customer behavior, restaurant performance, and business growth metrics.
- Cleaned and transformed raw datasets using Power Query, resolving missing values, duplicate records, and inconsistent data to improve data quality and reporting reliability.
- Designed a relational data model using fact and dimension tables to organize structured data and enable scalable analysis.
- Engineered DAX measures and business KPIs including Total Revenue, Total Orders, Average Order Value, Customer Count, and Restaurant Performance.
- Built interactive reports with KPI cards, slicers, drill-downs, and dynamic filtering to enable business performance monitoring and data-driven analysis.

Product Performance & Revenue Intelligence Platform

Python, SQL, Power BI, Pandas, NumPy

- Built an end-to-end data analytics solution using Python, SQL, and Power BI to evaluate product performance, sales trends, customer behavior, and revenue growth.
- Processed and validated raw datasets using Pandas, NumPy, and SQL, identifying missing values, duplicate records, and inconsistent data formats.
- Performed exploratory and business analysis to uncover revenue patterns, product trends, customer purchasing behavior, and performance indicators.
- Developed SQL queries for data extraction, filtering, aggregation, and analysis to prepare structured datasets for reporting.
- Created interactive Power BI reports with KPIs, filters, and visualizations to communicate insights and support data-driven business decisions.

EXPERIENCE & LEADERSHIP

President — GeeksforGeeks Student Chapter, NIET

Jul 2025 – Present

- Lead a technical community of **500+ students**, coordinating coding contests, workshops, and technical initiatives focused on programming and technology.
- Collaborate with **students, industry professionals, and academic stakeholders** to plan and execute technical sessions and community initiatives.
- Coordinate teams, communicate requirements, delegate responsibilities, and track activities to ensure **timely and effective execution** of events.
- Take ownership of planning and execution while resolving operational challenges and ensuring smooth coordination across teams.

EDUCATION

Noida Institute of Engineering & Technology (NIET), Greater Noida

Bachelor of Technology (B.Tech) — Computer Science & Engineering (Data Science)

Oct 2023 – Jun 2027

CGPA: 7.75/10
